CAREER INTERESTS

Entry level positions including:

- Junior Web Developer
- Junior Full-Stack Developer

ABOUT

I have recently finished a Diploma of Information Technology through an intensive Bootcamp at Coder Academy in Brisbane. Immediately after graduation, I started working as a Junior Web Developer in a marketing agency where I mainly developed Wordpress websites. I have worked in academia as a researcher, in Environmental Consultancy and Customer Service over the past 10 years, however, I have developed a passion for computers since the first time I connected to the internet through a Dial Up modem. You can see more about my soft skills, programming languages I speak and the tech-stack I use in my [GitHub](#) , [LinkedIn](#) and [my website](#).
